Supply and installation of 6mm toughened semi frameless showers
Supply and installation of Shower curtains
Supply and installation of vinyl back mirror robes
Supply and Installation of 6mm toughened glass splashbacks

CLEANING GLASS & MIRRORS

Achieving a streak-free shine

Cleaning glass and mirrors is never an easy task but with the right products, it is possible to achieve a streak-free shine without excessive use of elbow grease.

The two most important cleaning products required are:

- a flat weave microfibre cloth
- an industrial strength glass cleaner

TIPS & TRICKS FOR CLEANING GLASS & MIRRORS

- Use a dry, flat weave, microfibre cloth as it will not leave traces of lint and promotes faster drying
- Fold your cloth into quarters as it will give you 4 clean surfaces to use when wiping your glass/mirror
- Use Vetrokleen™, an industrial strength glass cleaner, as it contains solvents which dissolve grease, paint, glue and permanent markers
- Spray Vetrokleen™ directly to the surface to be cleaned using a fine mist from the top down, ensuring you do not soak the area
- Work quickly and wipe frequently as the solvent ingredients will cut through residue quickly as it dries
- Do not use abrasives, scourers or cleaning products, such as powders on glass as they are likely to scratch the surface
- Where there is excess grime on glass or mirror, begin cleaning with a wet microfibre cloth soaked in a cleaning solution before beginning the process with Vetrokleen™ and a dry lint free cloth

Industrial strength glass cleaner

Vetrokleen™ is used and recommended by professionals for all glass surfaces. It is suitable for windows, mirrors, splashbacks, windscreens, countertops, appliances, bathfixtures, ceramic, tile, formica, stainless, aluminium and more. Stubborn film and haze dissolve instantly, leaving your surfaces sparkling clean.

CONTAINS:

Vetrokleen™ contains ingredients which act as solvents which is the reason why it is so effective at removing residue from glass and other surfaces. It can damage some surfaces, i.e. polished timber, fabric and some plastics and films. If spilled on sensitive surfaces, wipe off immediately. It is suitable to clean items made of certain grades of plastic, such as polypropylene. If unsure of the grade of plastic or film, always test the cleaning method on a small and inconspicuous area of your surface first. Never use on painted plastic.

SAFETY & FIRST AID

Vetrokleen™ is a highly flammable liquid. Keep out of reach of children. Keep away from heat/sparks/open flames/hot surfaces. No Smoking. Store in a well ventilated area away from sources of ignition.

When in direct contact with eyes or skin, this product can cause irritation. In case of contact with eyes, flush with water. If swallowed, contact a Doctor or Poisons Information Centre. Material Safety Data Sheet available online www.fgs.com.au/Vetrokleen.aspx

Semi Frameless Shower

Product Compliance and Service Warranty

Date of Warranty Agreement: 24th April 2024

Client Details: Valeo Construction Pty Ltd
Level 9, 608 St Kilda Rd,
Melbourne VIC 3004

Install address: 69 High Street,
Preston

DIGA Job Number(s): 13133
